Interior & Exterior**

Packing Available in 25kg & 5 kg Bags

Surya Plus Powder Based Cement Primer Interior & Exterior

SURYA PLUS is manufactured using special ingredients and additives that allow easy mixing, better adhesion, faster setting and higher coverage. This product is used as an undercoat before applying any over coat such as paints and wall putty as it has an excellent Adhesion to top coats.

SURYA PLUS Powder Based Cement Primer

Salient Features :-

- Over Surya Plus Cement Base you can apply any kind of Emulsion Paint or Leave it as it is. It will look like White Paint Painted Building. Provides UV
- protection for the surface.
- Promotes uniformity in the finish coat.
- Provides an excellent base coat for other Decorative Paint and wall Putty.
- Improves coverage of either finish or coating applied over it.
- Superior filling property and long term protection against algae & fungus.

Key Benefits :-

- For Interior and Exterior use like Acrylic Primer.
- Reduces cost of white Cement & Acrylic Primer.
- Rich Whiteness after the coating dries.
- It can be used as a ceiling white Paint.
- No VOC hence an Eco – Friendly product.
- No post curing required.

Method of Application :-

Mix 1kg SURYA PLUS in a clean vessel with 1.5 to 2 Liters of clean water. After through mixing apply with a brush. Allow the surface to dry completely. Leave the surface overnight and second coat and allow the surface to dry completely. If desired over this apply any water based emulsion paint, as per customer's requirement.
